FOR PEOPLESOFT

Marine Mechanical Engineer

Job Overview
Crowley Maritime Corporation is currently seeking a temporary (6 month minimum) with possible full-time hiring potential Marine Mechanical Engineer located in Seattle, WA.

- Designs and oversees construction, modification, and repair of marine craft and floating structures, such as ships, barges, tugs, work boats, etc.
- Studies design proposals and specifications, and oversees construction and testing of prototype.
- Implements mechanical standards and procedures & ensures regulations and procedures in house meet current regulatory requirements.
- Provide bid support in the area of system design as required.

Required Experience
The successful candidate will have a minimum of 5 years of experience in [description].

Additionally, the successful candidate will display the following key competencies:

- Must possess skill sets and demonstrate proven experience designing marine mechanical systems to meet USCG, classification society, and IMO rules and regulations.
- Be cognizant of staying within scope, budget and timeline.

Although not required, any one (or more) of the following is preferred:

- Professional Engineering (PE) license, or on track to obtaining a PE is a plus.

Required Education
The successful candidate will have a Bachelors degree or equivalent in mechanical engineering, naval architecture or related field. A combination of post high school and equal experience may be substituted for education.
