WEBB INSTITUTE

SCIENCE FACULTY POSITION AT WEBB INSTITUTE

Webb Institute is looking for a permanent faculty candidate to teach undergraduate science and engineering science subjects to highly capable engineering students. The position is for someone with a strong background in physics, chemistry, math, and engineering sciences. The starting rank will be either Assistant or Associate Professor, depending on background and experience. The projected starting date will be January 2016 with spring classes beginning at the end of February 2016.

Because Webb Institute is a very small four-year college, the emphasis is on undergraduate teaching. Previous teaching experience is desired though not required. The successful candidate can expect to teach lower and upper-level undergraduate courses. The position requires the successful applicant to:

- Be able to teach standard undergraduate courses in chemistry, physics, and engineering sciences. Certain courses include a laboratory component.

- Be able to manage science laboratories, oversee budgets, and supervise laboratory technicians.

The typical course load is two classes each semester. In addition, the faculty member will be encouraged and given opportunities to engage in research or other forms of professional development.

Ideally, applicants should have an appropriate earned doctorate, but a Bachelor’s degree in science or engineering plus a Master’s degree in the same or a closely-related discipline is required.

The selected candidate will be expected to teach undergraduate classes as his/her primary responsibility, but also to serve on faculty committees and to participate actively in the full scope of campus life.

Interested individuals should submit curriculum vitae, statements regarding research and professional interests, and contact information for three references to:

Dr. Richard Harris
Faculty Search Committee Chair
Webb Institute

Review of applications will begin immediately and will continue until the position is filled. Webb Institute is an EO employer. Applications will be accepted until the position is filled. Employment is contingent upon successful completion of a background check (Criminal, Education, and Employment Verification).
